

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

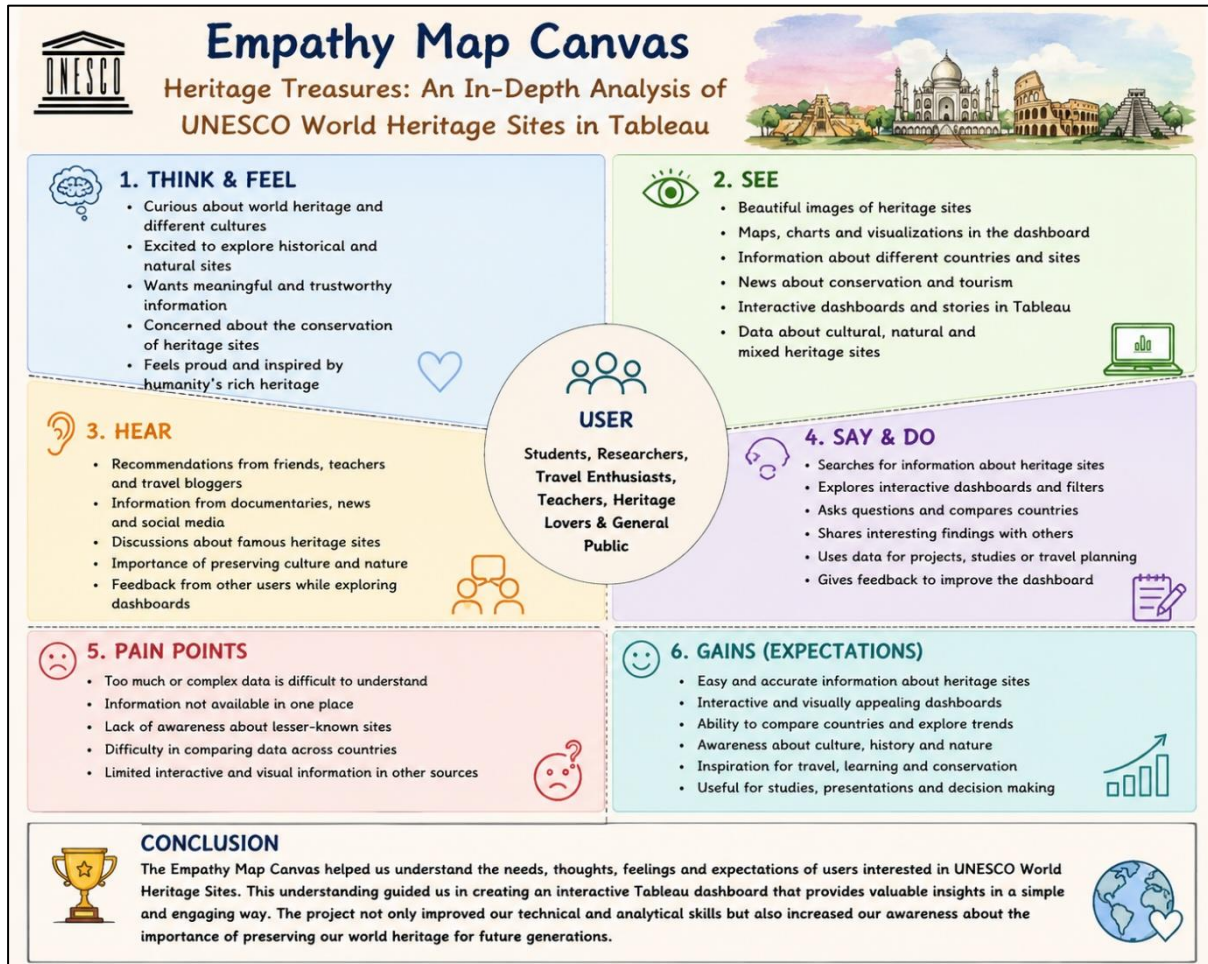

TEAM ID	STUID-2023-2399
PROJECT TITLE	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
MAX MARKS	4 MARKS

2.2 – Empathy Map Canvas: The Empathy Map Canvas for Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau was really helpful. It gave us an idea of what users need and want when they are looking at UNESCO World Heritage Sites. We looked at what users see think, feel, hear say and do. This helped us understand what they like and what they find difficult when they are looking at information about heritage. We found out that users want information that's easy to find and nice to look at. They want to learn about the history and culture of heritage sites. Users also like it when they can interact with the information. The Empathy Map Canvas also showed us that users care about taking care of heritage sites and they want to learn about places and cultures. Making the Empathy Map Canvas helped us design the Tableau dashboards and stories with the user in mind. We made sure the information was clear and easy to understand. We also made sure the pictures and graphs were helpful and gave users what they needed. This made the project better and more useful.

In conclusion the Empathy Map Canvas was very important. It helped us understand what users think and feel. It guided us when we were working on the project. The Empathy Map Canvas helped us make a project that was interesting and meaningful. It also helped us learn more about designing things with the user in mind. The Empathy Map Canvas was a part of why the project was successful. It helped us make sure the final project was helpful and relevant to the users of Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites, in Tableau.
