CHAPTER – III

REQUIREMENT ANALYSIS

3.1 – Customer Journey Map: Customer Journey Map

The Customer Journey Map for Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau is really important. It shows us how people use the project from start to finish. We want to know what people experience what they do and what they expect when they look at information about UNESCO World Heritage Sites using Tableau. People start using the project when they want to learn about UNESCO World Heritage Sites. They open the Tableau dashboard. Start exploring. They use maps, charts and filters to find out about sites, countries and regions. As they look at the visualizations they learn more about where these sinters what kinds of sites they are and why they are important. The interactive parts of the project make it easy for people to compare information find patterns and understand what they are seeing.

When people use the project, they want to get information. They want the pictures and charts to be clear and easy to understand. They want to be able to use the project without getting frustrated. If they can quickly find the information they need and look at the data without problems, they will be happy. At the end of the journey people will know more about UNESCO World Heritage Sites. Why they are important for keeping our culture and nature safe.

The Customer Journey Map helped us understand what people need what they expect and how they use the project at each step. This helped us make dashboards and stories. We want people to have an experience when they use the project. We want the project to be helpful, interesting and easy to use. The Customer Journey Map for Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau is very useful, for this.
