Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

❖ STEPS TO CREATE TABLEAU SHEETS

❖ SHEET 1:-TOP 10 REGIONS BY AREA:

- ❖ Double-click **Latitude (generated)** (goes to Rows)
 - Double-click **Longitude (generated)** (goes to Columns)
- **Change to Filled Map** On Marks card,
- ❖ click **Automatic** dropdown
 - Select **Filled Map**
 - **Add Region to Colour**
- ❖ Drag **Region En** to **Color** on Marks card
 - **Add Area to Colour**
- ❖ Drag **Area Hectares** to **Color** (below Region En)
 - Aggregation defaults to **SUM**
 - **add Region to Label**
- ❖ Drag **Region En** to **Label** on Marks card
 - **Add Area to Label (optional)**
- ❖ Drag **SUM (Area Hectares)** to **Label**
 - **Filter Top 10 regions by area**
- ❖ Drag **Region En** to **Filters**
 - Click **Top** tab
 - Select **By Field**
 - **Top** → 10
 - **by** → Sum (Area Hectares)
 - Click **OK**
 - **Format Colours** Click **Color** on Marks card
 - Click **Edit Colors**
 - Select **Blue** or **Orange-Red** palette
 - Check **Stepped Color** (optional)
 - Click **Apply** → **OK**
 - **Format Labels**
- ❖ Click **Label** on Marks card
 - Check **Show mark labels**
 - Click ... to adjust font size
 - **Remove Nulls (if any)** Right-click Region En on Filters
 - Select **Filter** • Uncheck **Null**
 - Click **OK**

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

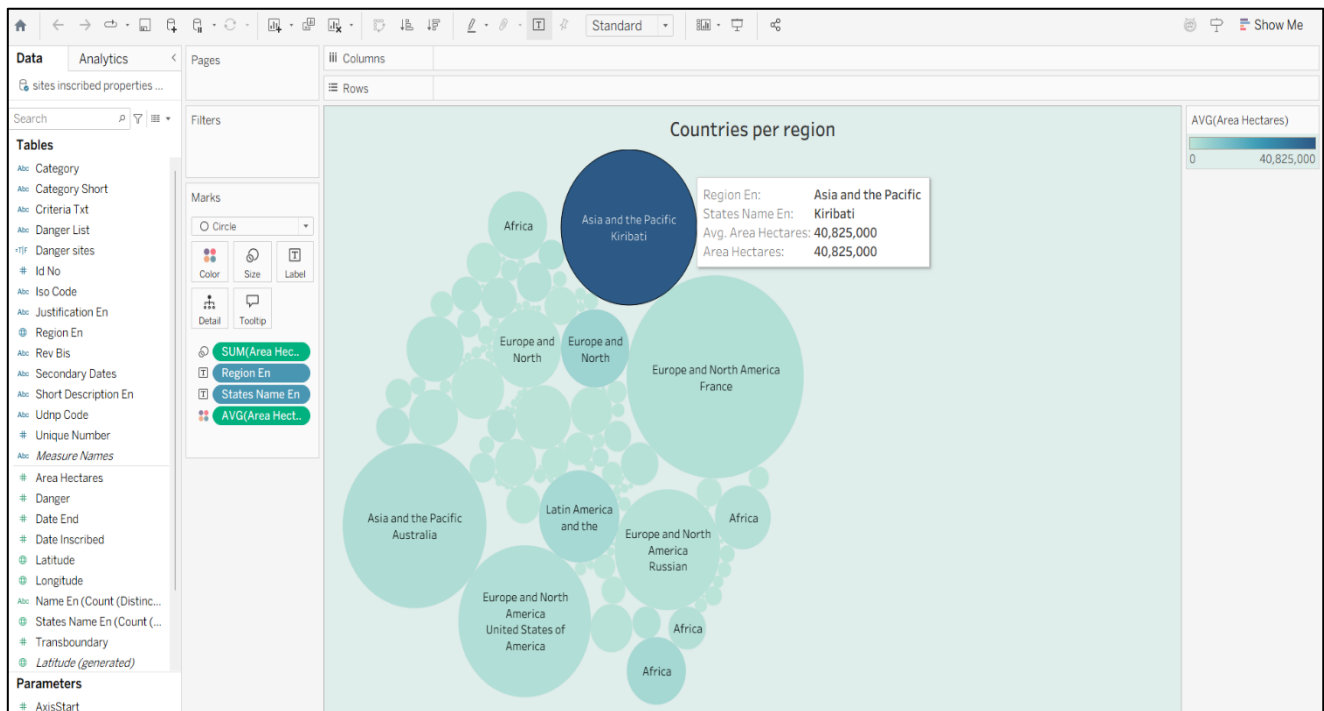

OUTPUT:

- ❖ **SHEET 2: COUNTRIES PER REGION:**
- ❖ **Step 1 –**
- ❖ **Marks type changed to Circle** Marks card dropdown: **Automatic** → **Circle**
 - **Step 2 –**
- ❖ **Region En added to Color** Each region gets a different Color bubble
 - **Step 3 –**
- ❖ **States Name En added to Size Count Distinct** of countries determines bubble size
 - More countries = larger bubble
 - **Step 4 –**
- ❖ **Region En added to Label** Shows region name on each bubble
 - **Step 5 –**
- ❖ **CNTD (States Name En) added to Label** Shows number of countries inside each bubble
 - **Step 6 –**
- ❖ **Size slider increased** Bubbles made larger for better visibility
 - **Step 7 –**
- ❖ **Null values removed** Unchecked **Null** from Region En filter.

OUTPUT:

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

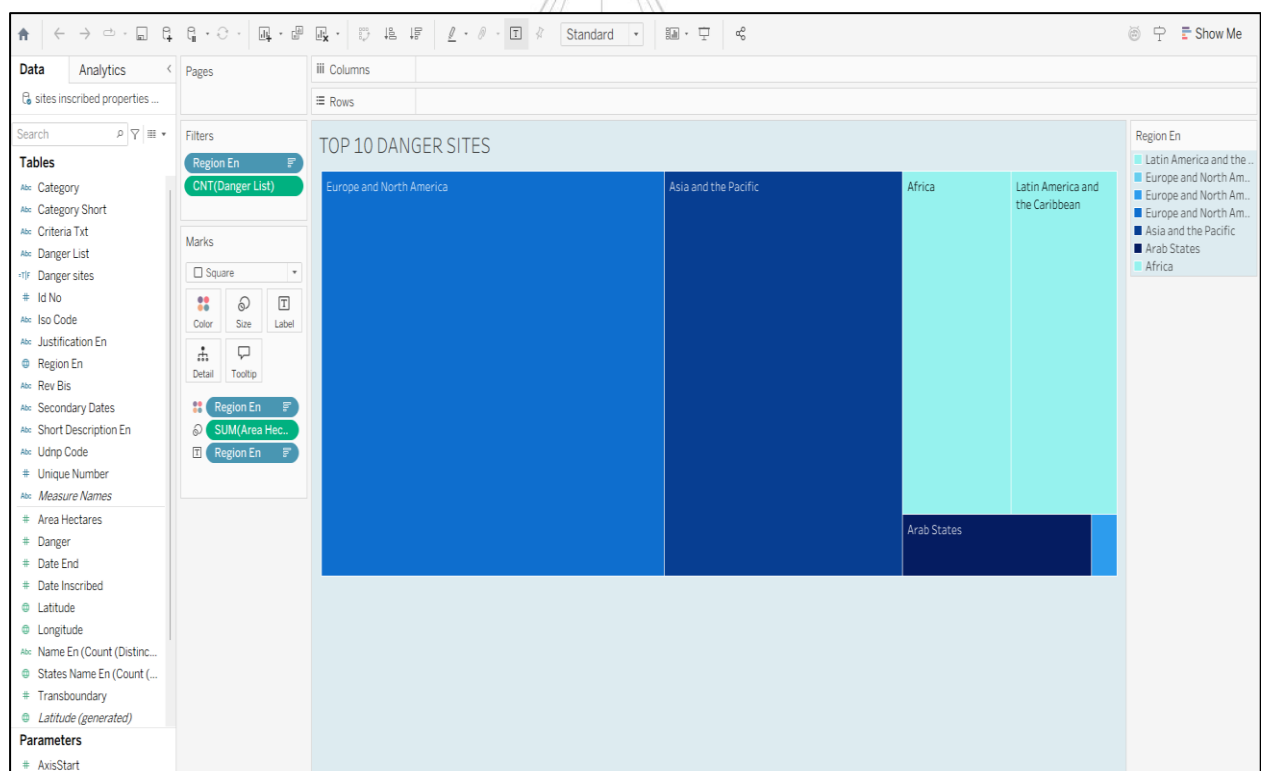

❖ SHEET 3: TOP 10 DANGER SITES:

- ❖ Filter Danger sites
- ❖ Drag Danger to Filter
 - Select Yes → OK
 - Step 2 – Set Year on Columns
- ❖ Drag Date Inscribed to Columns
 - Right-click Date Inscribed → Year (continuous - green pill)
 - Step 3 – Add Bar (Count of Danger Sites)
- ❖ Drag Name En to Rows
 - Right-click Name En → Measure → Count
 - On Marks card, click dropdown for CNT (Name En) → Select Bar
 - Step 4 – Add Line (Area of Danger Sites)
- ❖ Drag Area Hectares to Rows (to the right of CNT(Name En))
 - Right-click Area Hectares → Measure → Sum
 - Step 5 – Create Dual Axis
- ❖ Right-click on the SUM(Area Hectares) axis (right side of the view)
 - Select Dual Axis
 - Step 6 – Change Line chart type
- ❖ On Marks card, click the SUM(Area Hectares) tab
 - Change Automatic to Line
 - Step 7 – Synchronize Axes (optional)

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- ❖ Right-click right Y-axis → **Synchronize Axis**
 - **Step 8 – Color the Line differently**
- ❖ On **SUM(Area Hectares)** Marks card → Click **Color** → Choose Orange or Red
 - **Step 9 – Add Labels (optional)**
- ❖ On **CNT(Name En)** Marks card → Drag Count(Name En) to **Label**
 - On **SUM(Area Hectares)**
- ❖ Marks card → Drag SUM(Area Hectares) to **Label**
 - **Step 10 – Rename sheet**
- ❖ Right-click sheet tab → **Rename** → Analysis of Danger Sites and Areas.

OUTPUT:

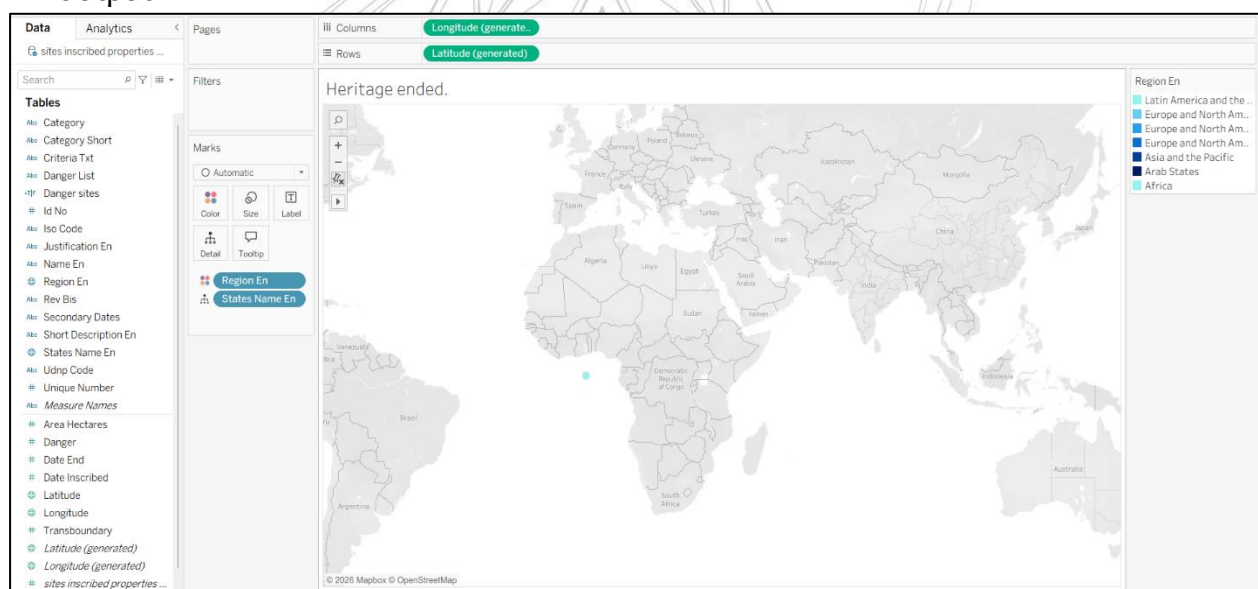

- ❖ **SHEET 4 : HERITAGE ENDED:**
- ❖ Double-click Latitude (generated) – it moves to the Rows shelf.
Double-click Longitude (generated) – it moves to the Columns shelf
- ❖ On the **Marks** card, change the mark type from **Automatic** to **Filled Map**.
- ❖ From the Data pane, drag States Name En (Country) to **Color** on the Marks card.
- ❖ From the Data pane, drag Name En to **Color** (below States Name En) and set its aggregation to **Count (Distinct)**.
- ❖ This makes color intensity represent the number of ended sites per country.
- ❖ From the Data pane, drag States Name En to **Label** on the Marks card

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- ❖ From the Data pane, drag CNTD(Name En) to **Label** to display the count of ended sites next to each country name.
- ❖ Apply the **Heritage ended** filter:
Drag Date End to the **Filters** shelf → in the pop-up, select **Non-Null values** → click **OK**.
This keeps only those sites that have an end date
- ❖ Click **Color** on the Marks card → **Edit Colors** → select a suitable scheme (e.g., Orange-Red or Blue) → click **Apply** and **OK**.
- ❖ Sometimes this doesn't apply for everyone while making sheet, or it may only show the country pointed you can choose those colors for the point on the map.
- ❖ Right-click the sheet tab → **Rename** → type **Heritage ended**.
- ❖ A **world map** showing only countries that have at least one heritage site with an end date.
- ❖ If the colors are not filled don't panic, sometimes only the pointer is Color filled or in some cases the colors may fill the map.

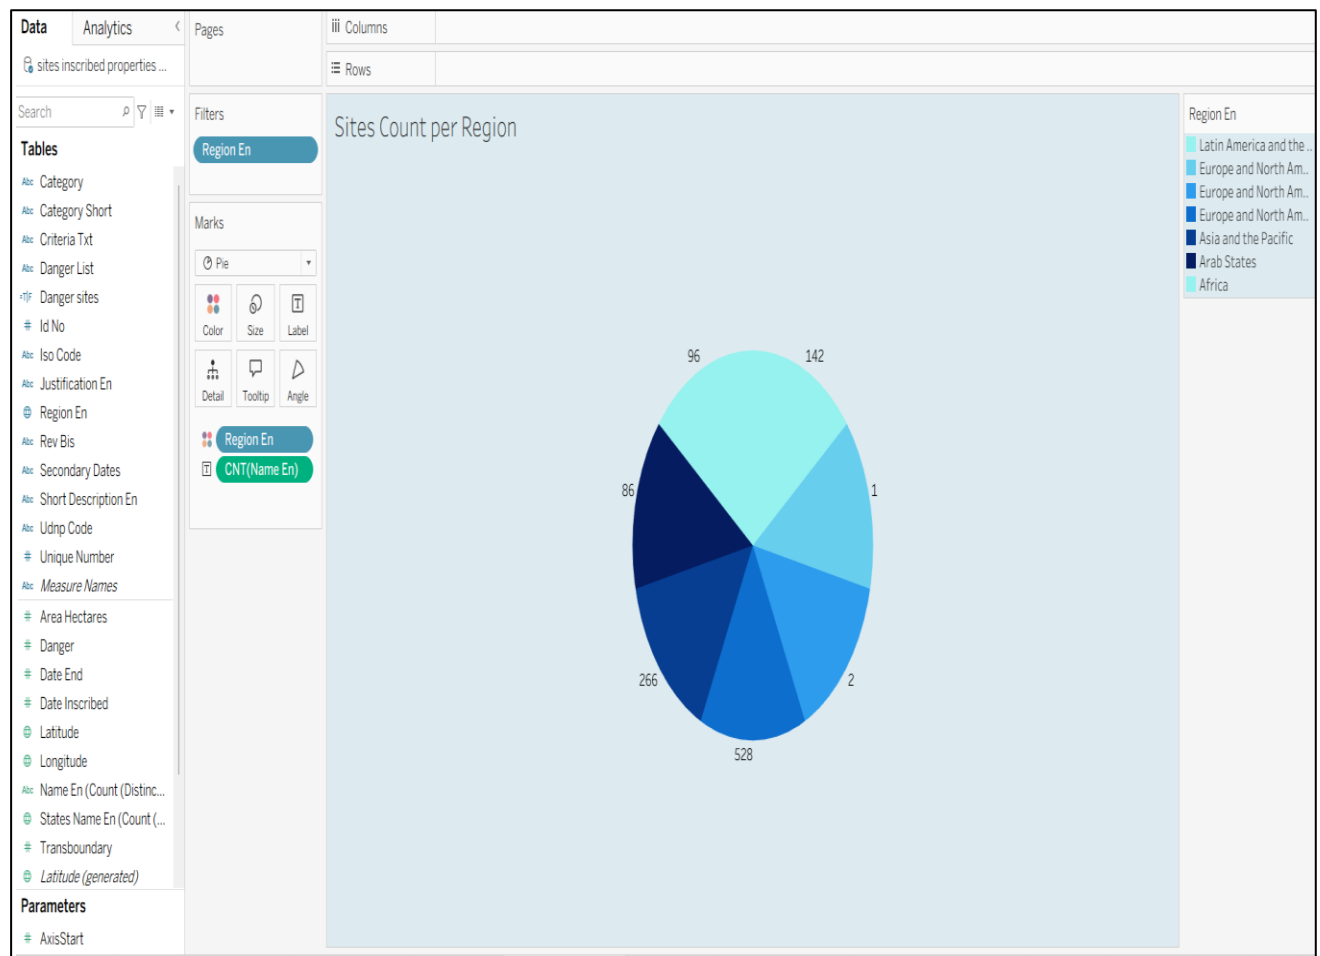

>>>Output:

- ❖ **SHEET 5-SITES COUNT PER REGION:**
- ❖ On the Marks card, click the dropdown that says Automatic and change it to Pie.
- ❖ From the Data pane, drag Region En to **Color** on the Marks card
- ❖ From the Data pane, drag Name En to **Angle** on the Marks card
- ❖ Right-click on Name En under Angle → **Measure** → **Count**.
- ❖ *This tells Tableau to count the number of sites per region*
- ❖ From the Data pane, drag Region En to **Label** on the Marks card
- ❖ Click on **Label** on the Marks card → check **Show mark labels** → adjust font size if needed
- ❖ Right-click on Region En under Color → select **Filter** → uncheck **Null** → click **OK**.
- ❖ Drag Region En to **Filters** → **Top** tab → **By Field** → **Top 10 by Count(Name En)**.
- ❖ Right-click the sheet tab → **Rename** → **Sites Count per Region**.

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

OUTPUT:

❖ SHEET 6- YEAR FORECASTING:

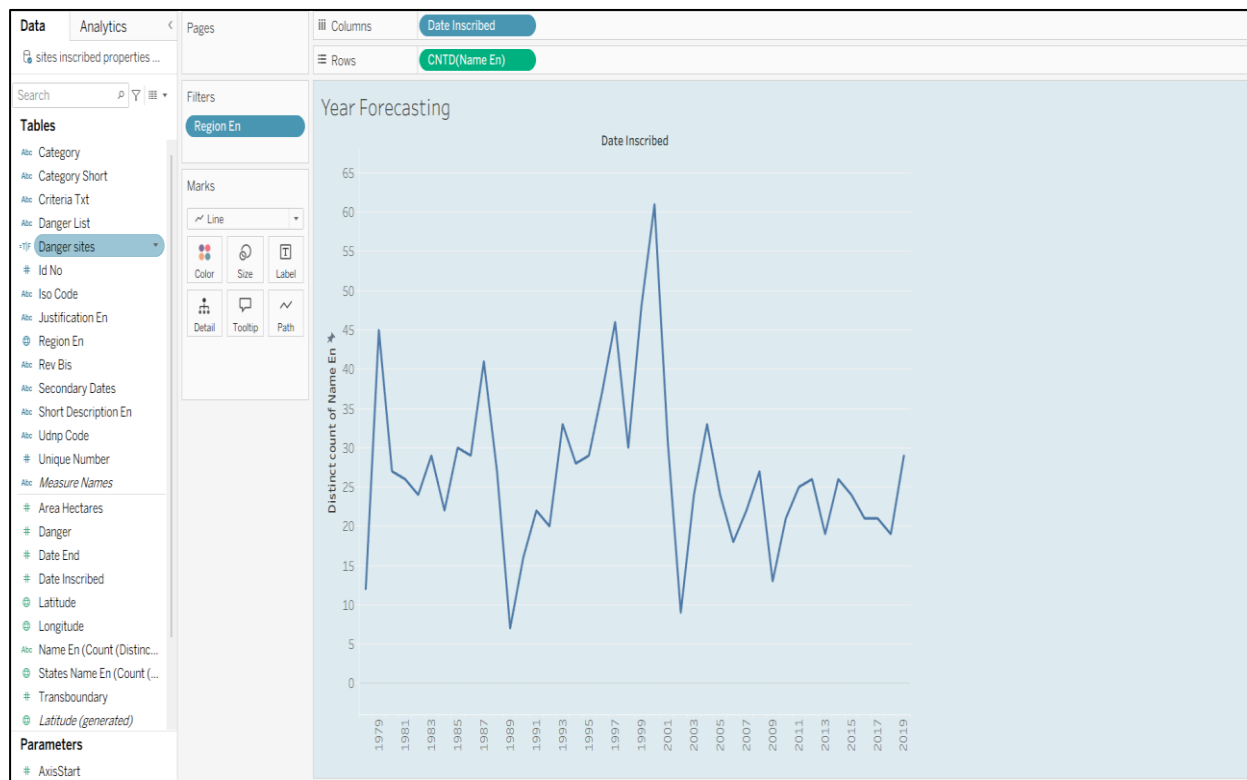

- ❖ Drag Date Inscribed to Columns
- ❖ Right-click on Date Inscribed on Columns → select **Year** (continuous – green pill)
- ❖ Drag Name En to **Rows**
- ❖ Right-click on Name En in Rows → **Measure** → **Count (Distinct**
- ❖ On the **Marks** card, click the dropdown that says **Automatic** and change it to **Line**
- ❖ Drag CNTD(Name En) to **Label** on the Marks card.
- ❖ Optional) Add Forecast:
Go to the **Analytics** pane → drag **Forecast** onto the view
- ❖ Rename the sheet:
Right-click the sheet tab → **Rename** → **Year Forecasting**
- ❖ **FINAL RESULT :**

- ❖ **X-axis:** Year of inscription (continuous)
- ❖ **Y-axis:** Number of unique sites inscribed each year

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- ❖ **Line:** Shows the trend over time
- ❖ **Labels:** Display the count at each data point

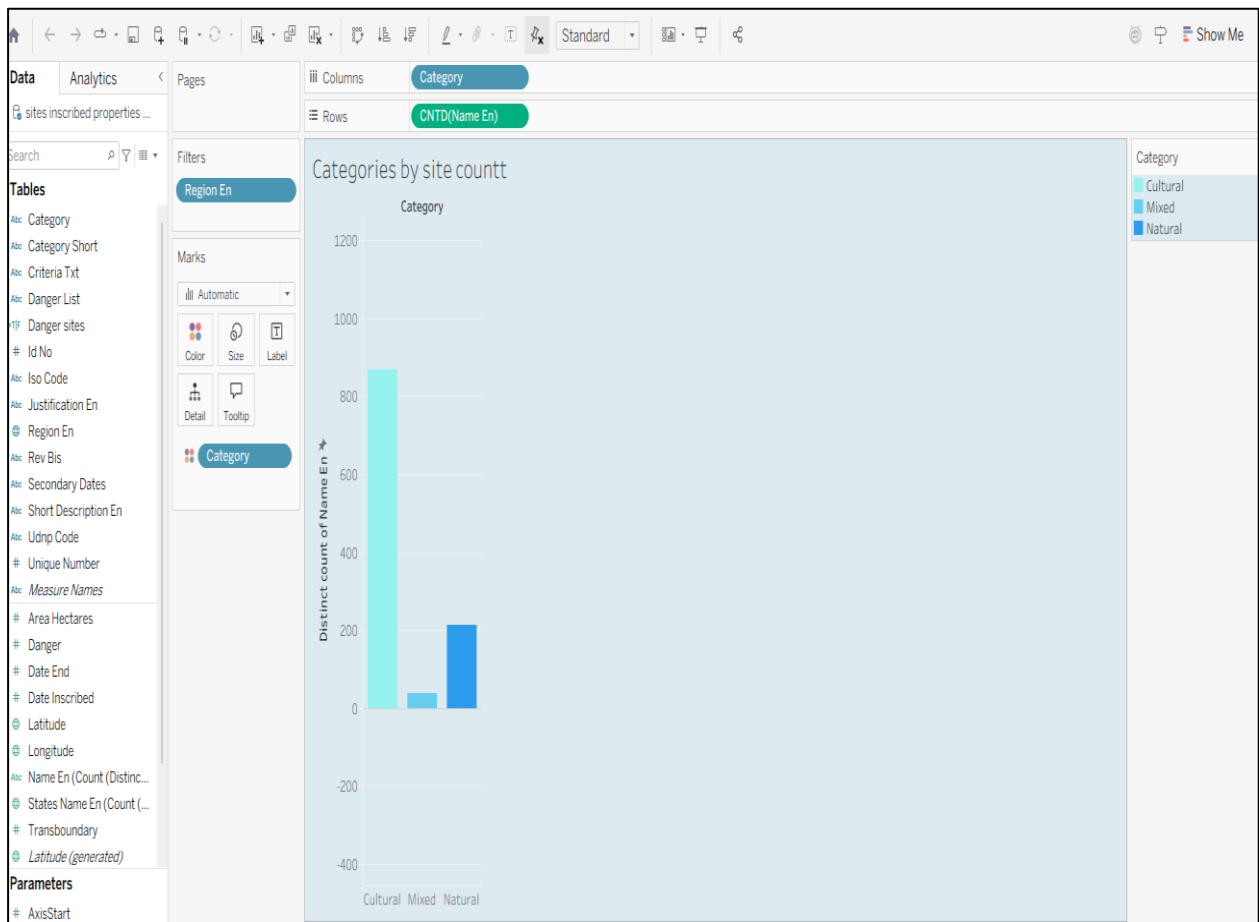

OUT PUT:

- ❖ **SHEET 7-Categories by site count:**
- ❖ Drag Category to Rows
- ❖ Drag Name En to Columns.
- ❖ Right-click on Name En on Columns → **Measure** → **Count**
- ❖ On the **Marks** card, click the dropdown that says **Automatic** and change it to **Bar**
- ❖ Drag Category to **Color** on the Marks card
- ❖ Drag Count(Name En) to **Label** on the Marks card
- ❖ Click on **Label** → check **Show mark labels** → adjust font size if needed
- ❖ Click on **Sort** icon in the toolbar to sort bars in **descending** order (largest to smallest)
- ❖ Remove Null values:
Right-click on Category on Rows → **Filter** → uncheck **Null** → click **OK**.
- ❖ OR just uncheck the values
- ❖ Rename the sheet:
Right-click the sheet tab → **Rename** → **Categories by Site Count**

OUTPUT:

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

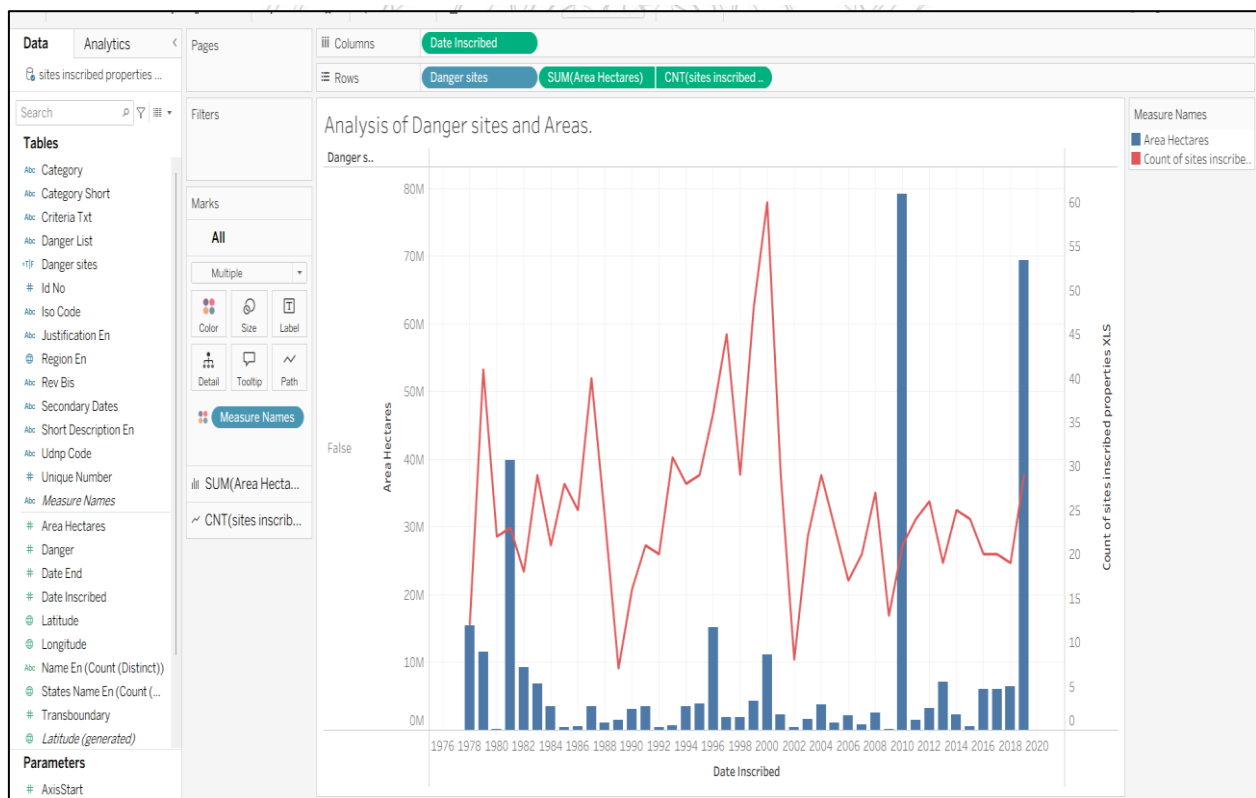

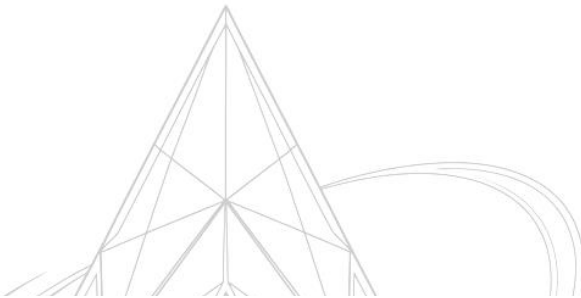

❖ SHEET 8- Analysis of Danger sites and Areas.

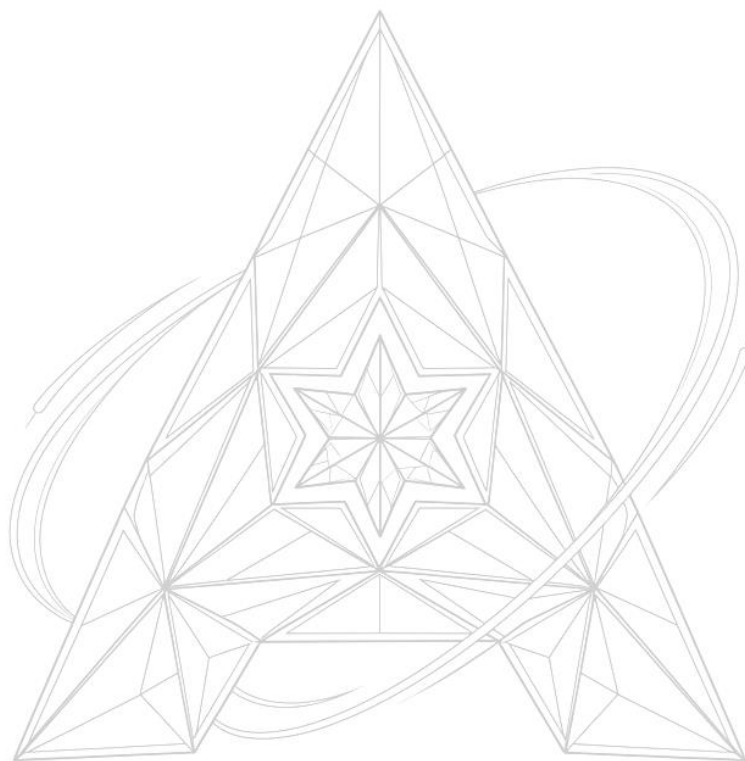

- ❖ Drag Danger to **Filters** → select **Yes** (or 1) → click **OK**
- ❖ Drag Date Inscribed to Columns
- ❖ Right-click on Date Inscribed on Columns → select **Year** (continuous – green pill)
- ❖ Drag Name En to **Rows**
- ❖ Right-click on Name En on Rows → **Measure** → **Count**
- ❖ Drag Area Hectares to **Rows** (to the right of CNT(Name En))
- ❖ Right-click on Area Hectares on Rows → **Measure** → **Sum**.
- ❖ In the **Marks** card, click the dropdown for SUM(Area Hectares) and select **Line**.
- ❖ Right-click on the right Y-axis → select **Synchronize Axis**
- ❖ if not visible then right click on the axis again click on **HIDE**.
- ❖ On the SUM(Area Hectares) Marks card → click **Color** → choose **Orange**
- ❖ On CNT(Name En) Marks card → drag Count(Name En) to **Label**
- ❖ On SUM(Area Hectares) Marks card → drag SUM(Area Hectares) to **Label**.
- ❖ On **show me** bar , select bar and line chart and your chart will look like this.
